Adaptive reuse, or adaptive re use architecture, is the process of repurposing buildings that have outlived their original purposes for different uses or functions while at the same time retaining their historic features. an increasing number of examples can be found around the world. a closed school may be converted into condominiums.

Adaptive Reuse Architecture Theory - Luxury Modern Design

The constant in architecture's evolution is change. Adaptive Architecture explores structures, or environments that accommodate multiple functions at the same time, sequentially, or at periodically recurring events. It demonstrates how changing technological, economic, ecological and social conditions have altered the playing field for architecture from the design of single purpose structures ...
