Honda V4 Motorcycle Engine

Prior to its adoption by Honda, the V4 design had been used only rarely for motorcycles, most notably by Matchless. In modern times, the V4 configuration has been embraced by Aprilia, Ducati, Suzuki, Yamaha & Norton.. Compared to an in-line four, the advantages of a 90° V4 engine include compactness, narrow width, and perfect primary balance giving a smooth and nearly vibration-free operation.

Honda VF and VFR - Wikipedia

The VF1000R was the first road going Honda V4 to feature gear driven cams, which appeased sportsbike riders, however what Honda needed was a bike to take the V4 engine to the masses. A plan was hatched to make an absolutely bulletproof V4, a bike that would cement the V4's reputation in road rider's minds.

The History of Honda's V4 Obsession - Bennetts UK

Honda has long believed the V4 to be the ultimate engine layout for a motorcycle, and it may be right. Done well, a good V4 mixes four-cylinder power with V-twin midrange and torque. That combination of devastating speed and easygoing power has made Honda's four-stroke V4s dominant in all kinds of racing, including the Isle [...]

HONDA'S V4 EVOLUTION - Australian Motorcycle News

[cover image courtesy of Honda VFR800] The V4 is everything you could want in a motorcycle engine. It has been described as the perfect engine layout, comprising flexibility, smoothness, and purity of output. It is widely used in top level racing, both in superbike and MotoGP, and has had great success.

This Midget is now propelled by a 1,098cc V-4 sourced from a 1984 Honda V65 Magna motorcycle. Despite being a smaller engine designed for a smaller vehicle with half the wheels, this is actually a ...

This MG Midget is Powered by a V-4 Honda Motorcycle Engine

Honda RVF1000R – Honda is preparing a new superbike with four-cylinder V engine with which they aim to regain the prominence lost in the World Superbike. From Japan, Young Machine magazine has produced a render that promises to be very close to the sporty one that Honda will put in dealerships from 2019 or 2020, a motorcycle that, unlike the exclusive RC213V-S of 180,000 euros, the Honda ...

Section Three: Honda V4 Information. I owned a Honda V45 sabre (VF750S) from 1985 through 1996). Currently I own a 1993 Honda VFR750F. My VFR pages include product reviews and a series of articles on cartridge fork service, among other things.. I'm the KotV4 (Keeper of the V4) for rec.motorcycles.

Motorcycling -- The Honda V4 Files and More

To combat this, Honda developed a special tool to hold the cam in place. Any bike shop tuning a V4 had better have this tool. It doesn't cost much (\$15) and isn't hard to use. Get one; even though it doesn't completely solve the problem, it is a requirement. Part number is 07979-MK30000, name is "V4 tappet adjust".

If Honda ever decides to build a V4 superbike, the engine power out will have to deliver over 200 hp to compete with bikes like Ducati Superleggera V4 which makes 234 hp fitted with the racing kit. Furthermore, the Honda RVF1000R will need the latest electronics package equipped with traction control, cornering ABS, slide control, wheelie control, electronic engine braking, and riding modes.

Could this be the New Honda V4 Superbike? - DriveMag Riders

It might not look like it, but the Honda NT650 Hawk GT is an absolute blinder of a motorcycle, and it's no surprise that it makes for a popular track day motorcycle these days. Equipped with a rock-steady 647cc four-stroke, V-twin engine, the Hawk could produce a claimed 58 horsepower, and produce a tidy 31

It looks like Honda could be developing two new models in the form of the CB1000X and CBR1000R according to Young Machine. With the introduction of Euro5 compliant engines, most brands will have to refresh their model range and it looks like Honda could be working on an adventure sport bike, namely CB1000X to rival with BMW S1000XR and Ducati Multistrada 1260 S.

Rumour: 2021 Honda CB1000X ... - Motorcycles and rides

The P800 used a very wide-angle 170-degree V4 engine (therefore being close in appearance to a flat-four engine) with two cylinder heads and air cooling. V4 engines enjoyed particular popularity during the mid-to-late 1980s, especially in transverse-engined Honda motorcycles which had a 90-degree V4 engine with water cooling.
