### The History of Life

The history of life: looking at the patterns The central ideas of evolution are that life has a history — it has changed over time — and that different species share common ancestors. Here, you can explore how evolutionary change and evolutionary relationships are represented in "family trees," how these trees are constructed, and how this knowledge affects biological classification.

One answer is that a meaningful life is one that by definition has achieved choice-worthy purposes (Nielsen 1964) or involves satisfaction upon having done so (Hepburn 1965; Wohlgennant 1981). However, for such an analysis to clearly demarcate meaningfulness from happiness, it would be useful to modify it to indicate which purposes are germane to the former.
