Design215 Megapixels and Print Size Chart
Microsoft Excel is a great software program where you can analyze data and visualize them with charts and graphs.. And sometimes, Excel users find themselves needing to use these charts and graphs as images.. Unfortunately, there's no direct way to do it.. Usually, others use 'PrintScreen' and paste the captured screen image on an image editor like Paint or Adobe Photoshop.

How To Save An Excel Chart As An Image [High-Resolution Method]
Starting in R2015b, if you use print with the '-f0' option on a high-resolution system, then the size of the cdata output array is larger than in previous releases or on other systems. Also, the number of elements in cdata might not match the size of the figure in pixels based on the figure's PaperPosition property and the root's ScreenPixelsPerInch property.

Print figure or save to specific file format - MATLAB print - MathWorks
Check out this resource for pixels to print size and photo dimensions for printing. For example: A 12 MP camera has a frame resolution of 4288 x 2848 pixels. This means that the width of the photo contains 4288 pixels, and its height is 2848 pixels. Below a screenshot of photo print size chart (that is, pixel size to print size).

Image Size & Resolution: Best Resolution for Printing Photos

Making your DIY eye chart is easy... just type a custom message. Choose the font, and then you can download a printable high resolution pdf eye chart. By default the output is 8.5 x 11 inches (i.e. letter size), but you'll see there's also an option to print as A4 or 8 x 10" in case you want to fit a different size of frame.

Free Eye Chart Maker - Create Custom EyeCharts Online
This means that to print for a billboard, you don't actually need a very high resolution camera. So, if you want to print larger than your resolution allows (the red spots on the chart above), then decreasing the PPI (e.g. to 240 or less) will let you do this. But just make sure the print isn't going to be viewed up close! If someone is ...
