Integration: Structure and Envelope

OBJECTIVES. 1. To understand how the various systems that constitute a building design (space, structure, enclosure, environmental controls, circulation, etc.) are interwoven and integrated with a view to achieving various sustainability performances; 2. To attain an appreciation of building systems integration in architecture through case studies with an emphasis on sustainable design and construction; 3.

4) Easier Building Operation and Maintenance. Conventional 2D plans can be a hindrance once a building starts operations. Slight modifications to building system may not have a drastic impact, but when many of them occur over time the actual building systems may end up being very different from the as-built plans.
