Building a skyscraper? Forget about steel and concrete, says architect Michael Green, and build it out of ... wood. As he details in this intriguing talk, it's not only possible to build safe wooden structures up to 30 stories tall (and, he hopes, higher), it's necessary.

## **Why we should build wooden skyscrapers - TED**

The report shows the largest number of office skyscrapers, at 106, were built in the decade of the 1980s. They've dropped every 10-year period since. Residential skyscrapers are a bright spot in the report, as the 2010 decade produced at least 83, a record. From that standpoint, it's possible that Springfield missed the wave of skyscrapers, at least on the office side. But there's no ...

Vid Japanese scientists are putting a new spin on human life in outer space with a proposal for centrifugal skyscrapers on the Moon and Mars. Kyoto University academics and folks at Kajima Construction, one of the largest building firms in Japan, have partnered on the concept, which they call "Luna Glass" and "Mars Glass." If constructed, the glass towers would stand 400 meters tall (roughly ...
