Second, Dr. Luke used his medical training and ability as a mission field and a tool to further the gospel. Medicine, if one follows the Hippocratic philosophy, is patient centered and ideal for Christian involvement. Dr. Luke was a personal physician who was patient oriented. Thus the adjective "beloved" is used to describe him. The ...

An ambulance is a medically equipped vehicle which transports patients to treatment facilities, such as hospitals. Typically, out-of-hospital medical care is provided to the patient. Ambulances are used to respond to medical emergencies by emergency medical services (EMS). For this purpose, they are generally equipped with flashing warning lights and sirens.

Ambulance - Wikipedia

Research from aviation and wilderness firefighting is useful in health care because they all involve settings where there is a huge variability in circumstances, the need to adapt processes quickly, a quickly changing knowledge base, and highly trained professionals who must use expert judgment in dynamic settings. Research shows that in these disciplines, the adoption of standardized tools ...
